Good Design

Bad Design costs  
lives, money, & time

Do the calculation.

The Joy of Good  
Design

Pretty good is pretty easy  
I'll show you how

# Design for People

- People's tasks, goals, and values drive development
- Work with users throughout the process
- Assess decisions from the vantage point of users, their work, and their environment
- Pay attention to people's abilities and situation
- Talk to the *actual* experts

# To learn more...

- HCI Classes
- Don Norman, The Design of Everyday Things

# Memex

A scientist of the future records experiments with a tiny camera fitted with universal-focus lens. The small square in the eyeglass at the left sights the object (LIFE 19(11), p. 112).

who walked through it less

Bill: a gate that measures  
ceremonial gates

# How can we measure success?

## How do we know?

# Why Evaluate Designs with People?

What are some things you might  
want to learn about an interface?  
How would you find them out?

Different Methods  
Achieve Different Goals

*Some Examples...*

# Usability Studies

# Surveys & Focus Groups

San Francisco Street Light Fixtures Survey Exit this survey

Existing Street Light Options

**Fixture Alternate A**  
Lamp Type: High-pressure sodium  
Typical Use: Street light  
Configuration: Single head or twin head  
Sample Location: Dolores Street  
Height: 28'

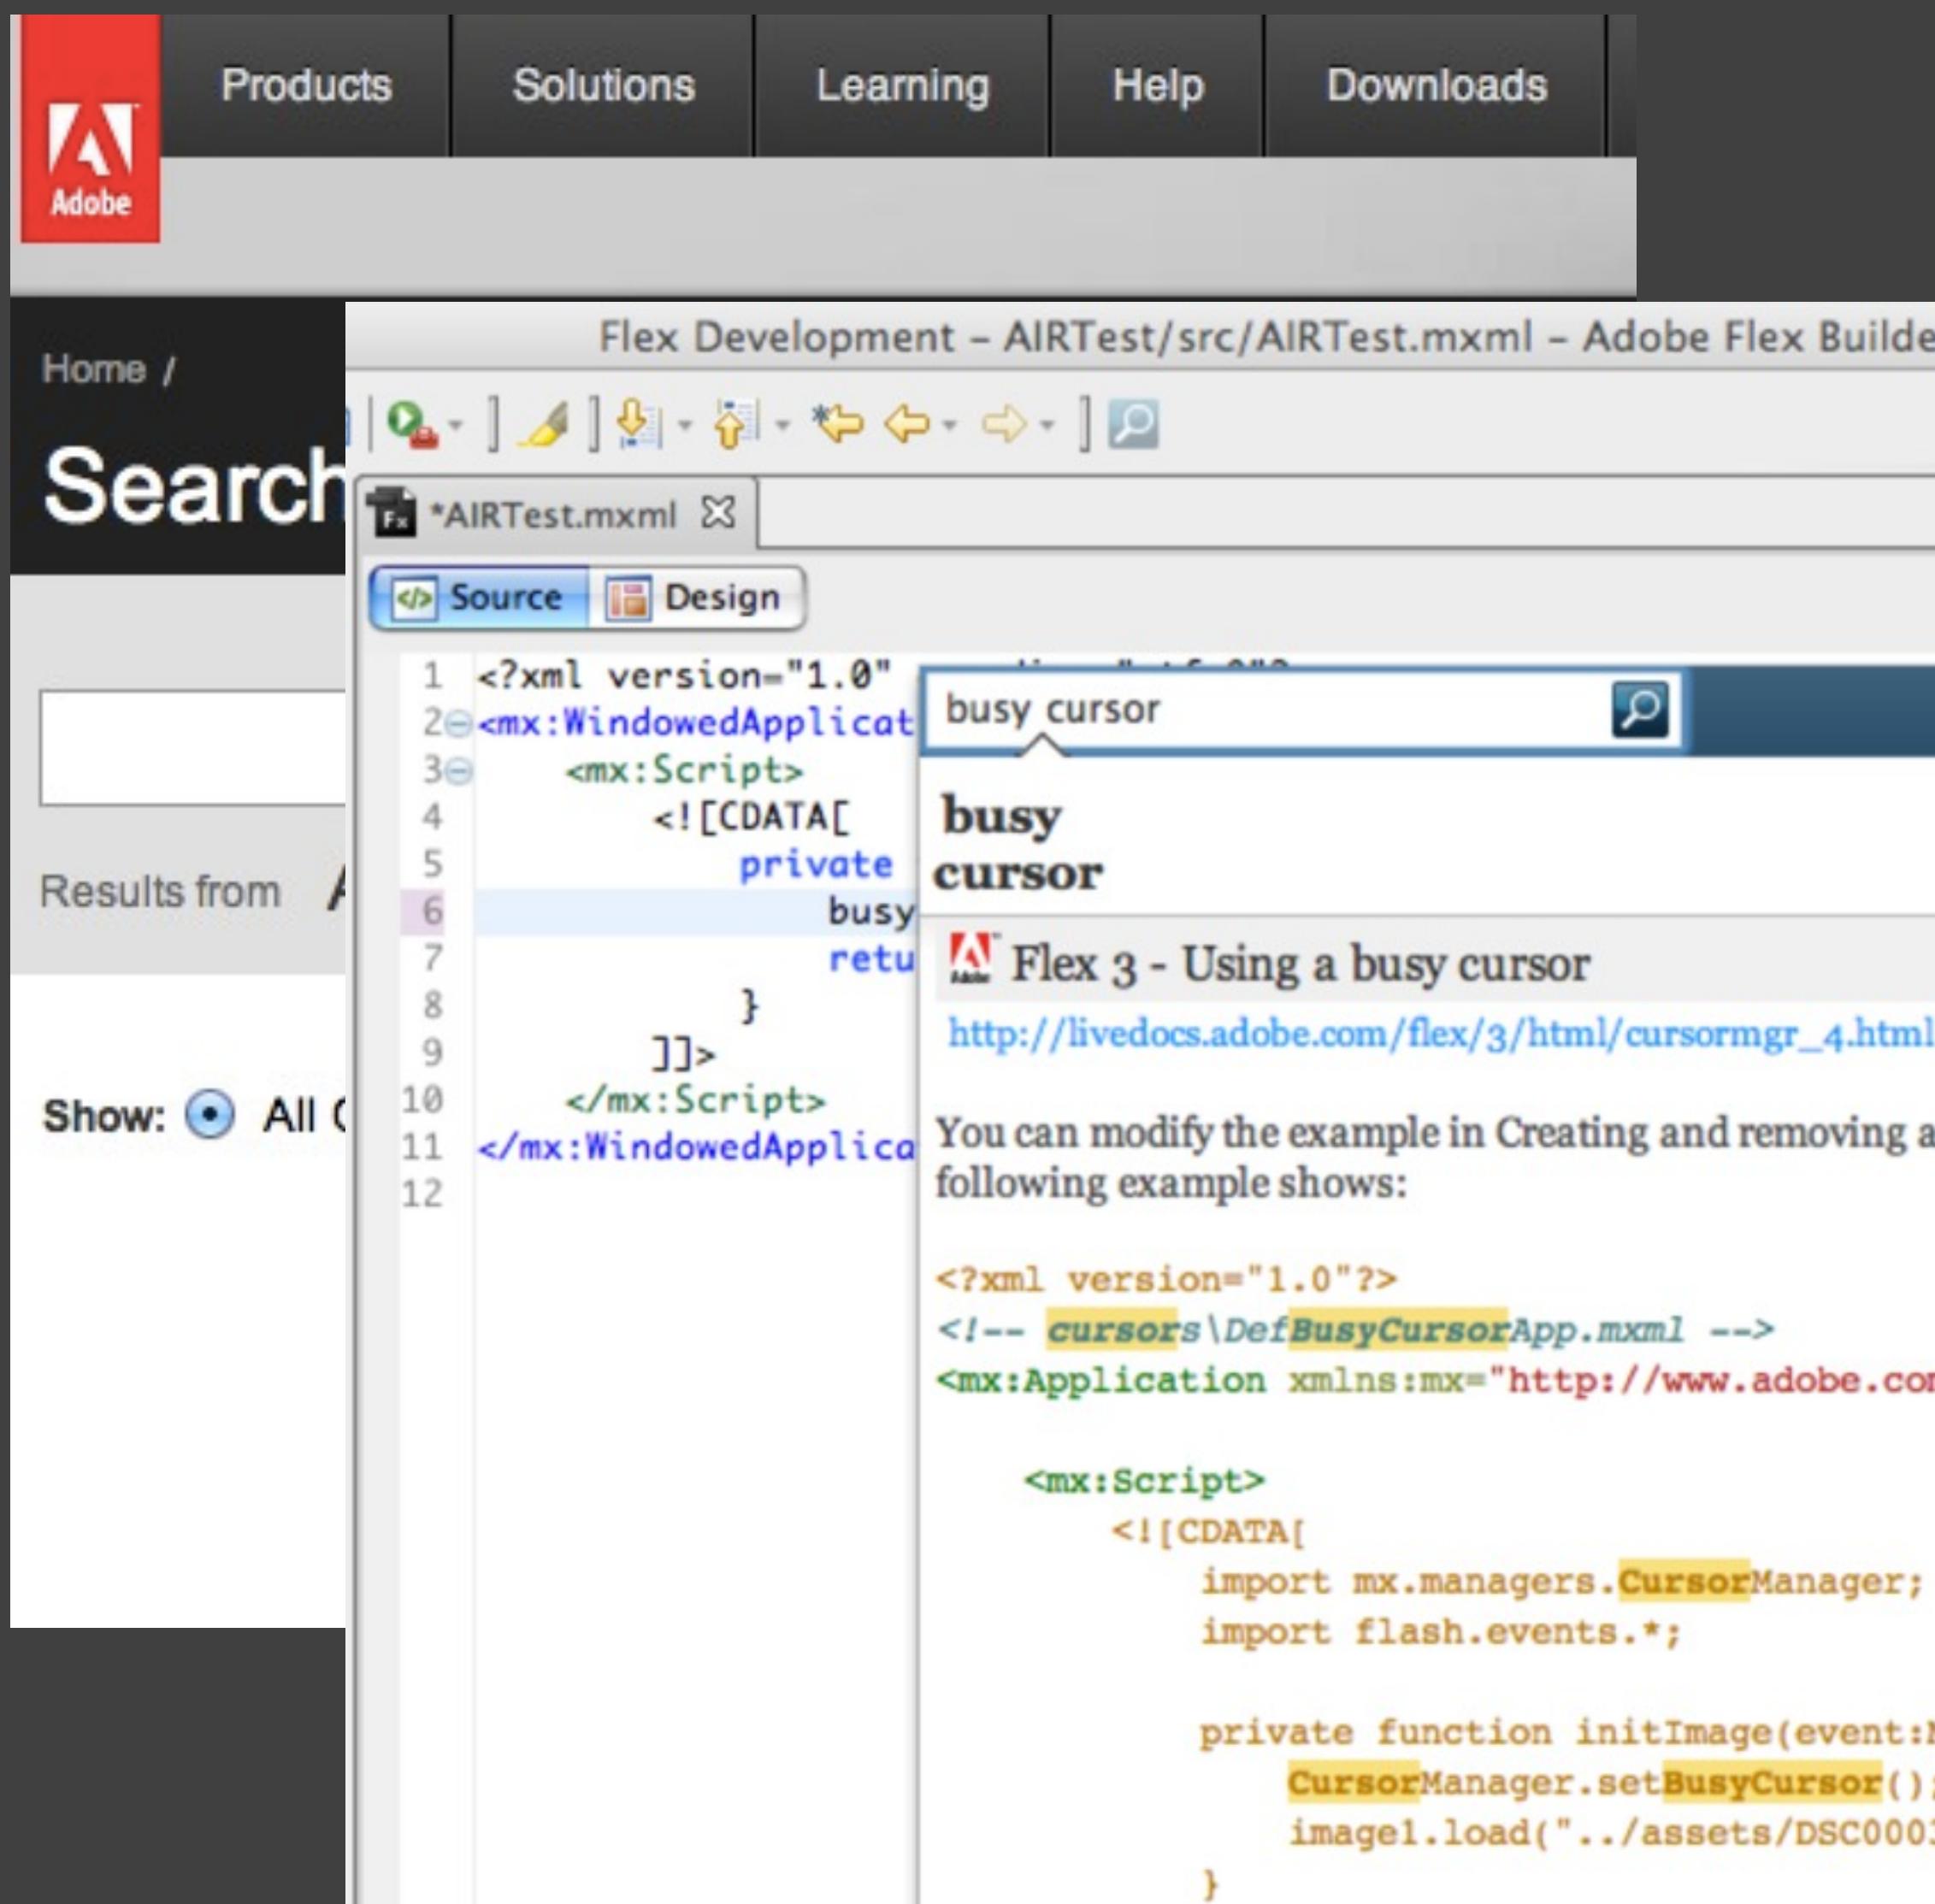

**What is your opinion about Fixture Alternate A**

I like the look of this fixture. It would be great for the streets in my neighborhood.  
 I like the look of this fixture, but it doesn't fit in my neighborhood.  
 I don't like the look of this fixture.

# Prototyping Grounds Communication

Prototyping is a strategy  
for efficiently dealing  
with things that are  
hard to predict

Focus on Goals  
Evolve the Designs

SANTA CLARA, California -- People thought Jeff Hawkins was crazy when they saw him taking notes, checking appointments, and synchronizing a small block of wood with his PC, pretending all the while that the block was a handheld computer.

*“If I wanted to check the calendar I'd take it out and press the wooden button.”*

# The rights of a prototype

- Should not be *required* to be complete
- Should be easy to change
- Gets to retire

# What Do Prototypes Prototype?

**Feel** *What might it look like?*

**Implementation** *What might it work like?*

**Role** *What might the experience be like?*

LEARNING /  
COMMUNICATION

“The best way to have a good idea is to have lots of ideas.”

*-Linus Pauling*
